Testing Tools: Selenium, GitHub, Hp Quality Center, JIRA, V1, qTest.
Network: TCP/IP, DNS, routing protocols, firewalls, and VPN.
Office tools: MS Office, Teams, Confluence, Slack, Notes++.

LANGUAGES

English (Full Professional)
Spanish (Native speaker)

GUILLERMO RODRIGUEZ

QA Engineer | 10+ years in Functional & Automation Testing | ISTQB Certified | Java, Selenium, TestNG, API | Helping teams ship reliable software

PROFESSIONAL OVERVIEW

Seasoned Test Engineer with 10+ years of experience in software quality, STLC, SDLC, and case management for application development.
Holder of 3+ ISTQB and other certifications with expertise in test strategy, planning, design, and best practices.
Proven leadership in motivating teams and aligning efforts with organizational objectives.
Strong background in Agile environments, microservices, web applications, and databases.
Skilled in risk communication, milestone tracking, and high-level debugging across all environments.

WORK EXPERIENCE

QA Engineer Lead

CPKC (Randstad) - (Calgary, AB) | Oct 23 – Jun 25
Leading Intermodal project contributes +35% of the company revenue, with expertise in test planning, execution, defect management and risk mitigation.

- Experienced in reviewing requirements, preparing test plans, designing scenarios, writing test cases, estimating effort, and overseeing QA tasks including execution, triage, tracking, and reporting.
- Skilled in coordinating and leading onshore, offshore, and UAT QA teams, while mentoring members and ensuring effective collaboration.
- Proficient in conducting defect review meetings, assessing prioritization and severity, and providing guidance to business, functional, and development teams.
- Strong background in functional and automation testing, knowledge transfer with SMEs, risk identification, and mitigation planning using Jira and Tricentis qTest.

QA Engineer Lead

Agile Thought (Jalisco, MX) | Jun 21 - Jan 23
Leading API automation and performance testing using ReadyAPI and Postman, delivering robust test coverage and functional validation.

- Designed comprehensive test cases, ensured full coverage, and executed functional system testing using Postman with JSON calls.
- Applied hands-on experience in case management with V1 tool to support efficient QA processes.
- Partnered with over 10 developers and product owners to refine user story requirements, reducing defect rates by 40%.
- Conducted walkthroughs, maintained rigorous documentation, and actively participated in Agile ceremonies to ensure alignment and early issue detection.

ISTQB CERTIFICATIONS

- CTFL Certified Tester, Foundation Level
- CTAL-TA Certified Tester, Advance Level Test Analyst
- CTFL-AT Certified Tester, Foundation Level Agile Tester
- CMT Certified Mobile Tester

Others:

- Certified SAFe 5.0 Practitioner
- CISCO CCNA
- CISCO CCNA CyberOps

ACHIEVEMENTS

- Recognition for the best average of the year 2006 (University).
- Recognition for the best average of the year 2007 (University).
- Amdocs 2019 Innovator of the Year award on the category Unique Idea in a New Domain; "Jalisco sin Hambre" tool.

COMMUNITY SERVICE

- Toys donation to children with cancer through "Nariz Roja" association.
- Volunteering at open house of Elboya school.
- Ramsay school stampede parking lot fundraising

QA Engineer Lead

AMDOCS (Jalisco, MX) | Feb 20 - Jun 21

Led end-to-end UI test automation creating 50+ scripts and improving efficiency by 60% through streamlined traceability.

- Spearheaded end-to-end UI test automation using Java, Selenium WebDriver, and TestNG, developing and maintaining 50+ regression scripts.
- Improved efficiency by 60% through a traceability matrix for timely script updates and issue resolution.
- Mentored 4+ junior testers on Agile SDLC, testing procedures, and product specifications, enhancing team performance.
- Performed PostgreSQL DB verification with DBeaver and leveraged Jira for effective test management and Agile alignment.

QA Tester

AMDOCS (Jalisco, MX) | Feb 17- Feb 20

Collaborated with cross-functional teams to test complex web applications, achieving 92% coverage through 200+ test cases and boosting efficiency by 30%.

- Collaborated with engineers, architects, and designers to test multiple web applications, ensuring efficiency and accuracy.
- Designed, executed, and maintained 200+ test cases, achieving 92% planned test coverage.
- Delivered testing reports with key insights that increased team efficiency by 30%.
- Performed REST Assured microservices testing in SoapUI and Postman, defect validation, DB verification in SQL Developer, log analysis with Splunk/Unix, and test management using IBM TDB.

QA Tester

IBM - (Stefanini) (Jalisco, MX) | Jan 13 - Feb 17

Developed functional and automation testing using RFT and Perfecto mobile, collaborating with cross-functional teams to ensure 100% requirement coverage.

- Developed functional testing and automation using RFT (Java-based) and Perfecto mobile environment.
- Collaborated with developers, architects, DBAs, and product owners to ensure 100% requirement coverage.
- Executed IVR, mobile, and web testing using Agile methodology, including SQL data verification.
- Managed test cases, test planning, test matrices, and test data across the full Software Test Life Cycle and SDLC using HP Quality Center.
